

Job Title: Electrical Installer/Technician, Electrician

Experience Required: 5+ years

Job Description:

Install, maintain, and repair electrical controls equipment for toxic gas monitoring system control panels. This position requires extensive knowledge of electrical components as well as electrical safety codes and regulations. Candidates must be professional, technical, and mechanically proficient. This position requires a strong background as an electrician, or as an electrical installer/technician with experience in low-voltage installations.

Qualifications and Skills Required:

- Minimum of 5-7 years of experience within industrial/commercial industries performing low-voltage installations—pulling wire/conduit
- Make terminators inside control panels
- Ability to read and understand wiring and control diagrams, blueprints and schematics
- Must be detail-oriented and able to work effectively on multiple projects in order to support clients
- Excellent critical thinking and problem-solving skills required
- Test and troubleshoot control panels and various sensors
- Ability to work with minimal supervision is desired.

Salary and Benefits:

This is a full-time, exempt position with a competitive salary and benefits package which includes medical and dental coverage, as well as 401 (k) retirement and profit sharing programs.
